

## MEGAtonic Mineral Mix

**MEGAtonic is specially formulated in New Zealand for New Zealand conditions.**

**Directions:** Shake mixture before use.

**Note:** It is advisable to filter the liquid tonic to avoid blockages to drench guns or medical dose measuring equipment. Rinse equipment after use (as the chemicals tend to be corrosive to metals).

**Precautions:** Keep this and all medications out of reach of children. Store in firmly capped plastic containers (not in metal containers). Take care to avoid inhaling the fumes. Wash hands and containers thoroughly after dispensing this tonic.

MEGAtonic is a great nutritional boost for maintaining consistently healthy animals. This product has been specially formulated in New Zealand for New Zealand conditions to supplement and promote growth and well being in Sheep, Beef, Cattle, Dairy and Deer. It was developed by none other than Dr Jim Bruce-Smith.

- ✓ Aids with weight gain in animals that have less than ideal feed conditions.
- ✓ Excellent for animals that require a high mineral intake.
- ✓ Very useful where animals are under stress.
- ✓ This product is easily added as a drench.
