

VITALIFE® Calcium for Herd Homes

VITALIFE Calcium is a bulk carbon product **supercharged with a diverse range of biology**, containing organic matter and beneficial microbes, along with lime (calcium). This diverse biology is selected to minimize smell and support natural defense against pests and diseases.

By boosting microbial diversity, VITALIFE helps improve soil structure, nutrient availability, and overall plant resilience when the bedding material is spread onto pasture.

Benefits

1. **Reduces ammonia, methane and sulphide gas** production and smell.
2. **Accelerates** dung and urine breakdown.
3. **Maintains** dry, biologically active bedding.
4. **Improves** animal health and comfort.
5. **Better nutrient availability** when applied to pasture.

APPLICATION	
Initial Application	Standard 100-200 g/m² Heavily soiled 200-300 g/m ²
First Follow-up Application	50-100 g/m ² after 7-10 days
On-going Maintenance	Normal 50 g/m ² every 2-3 weeks High stocking / wetter bedding 75-100 g/m ² every 2 weeks
Methods	Apply evenly over bedding surface. Lightly rake or incorporate where possible. Apply to slightly damp bedding.
Advice	If ammonia smell returns, wet or dark patches form or bedding becomes slimy or sticky then apply 75-150 g/m ² .
Storage	8 weeks out of direct sunlight
Notes	If bedding topped up use 100-150 g/m ² over new material. If bedding too wet then aerate as well as apply VITALIFE.

PROPERTIES	
Form	Bulk 800 kg bag
State	Mixed particle size
Specific Gravity	1.14
pH	3.5 – 3.9
Solubility	Insoluble
Odour	Low
BioGro Certified	Yes 4862
Handling	-
