

Actavize® for Pasture and Crops

Actavize is a balanced fish meal liquid foliar fertiliser formulated with 15 plant-available nutrients. It is designed to rapidly correct deficiencies, optimise nutrient uptake.

Actavize delivers immediate nutrition directly through the leaf, bypassing limitations in soil and root uptake. The formulation supports strong root development, improved plant resilience to environmental stress. Efficient nutrient use with minimal loss.

Benefits

1. Provides a complete range of macro, secondary and trace nutrients in a single application, supporting all stages of plant growth.
 2. Delivers rapid results enabling fast correction of visible deficiencies.
 3. Improves nutrient-use efficiency, reducing losses to leaching.
 4. Strengthens root systems, improving access to water and nutrients.
-
1. Enhances plant resilience to disease, temperature stress and moisture deficits by maintaining balanced internal nutrition.
 2. Ensures consistent application, compatible with spray, irrigation and aerial.

Nutrient Analysis

N	8	P	3	K	6
---	---	---	---	---	---

APPLICATION	
Application rate	15L per hectare <i>* Using as combo add 10L M-Power</i>
Dilution rate	1:20
Water quality	Dilute with non-chlorinated water
Spreader settings	To suit
Method	Land - Spray, pivot. Air - Fixed wing, helicopter (specify on order)
Filtered range	197 microns
Air temperature	Between 8°C and 20°C
Handling	Handle with Care
Timing	Early morning, late afternoon or late afternoon most suitable

PROPERTIES	
Form	20L 200L
State	Suspension Liquid
Specific Gravity	1.27
pH	5.5
Solubility	Soluble in water
Odour	Moderate
BioGro Certified	-
